List of Figures

1    this is a gitlab logo    . . . . . 1

Test only

# 1 Introduction

A simple document to test templates. Should be expanded to show how all markdown renders...

And a footnote <sup>1</sup>

This is a list

- A
- B
  - sub B
- C

and some more text.

And this is a really really long line with lots of text and blabla to ensure that must be doing a certain amount of line wrapping. That was a lot.

## 2 How does it handle strange characters?

- Danish letters: ><
- Accents: >¡<

## 3 Image

We want images to be where they are mentioned in the text, like this

Figure 1: this is a gitlab logo

---

## 4 A bit about the preamble options

- title: 'Template test'  
Document title, also used in headers.
- subtitle: 'Markdown + Latex + pandoc'  
Document subtitle
- authors: ['Author Name 1', 'Author Name 2']  
This is written on the front page. May be omitted.
- main\_author: 'Author Name 1'  
This is the contact person on the front page and used in footer.
- email: 'test@example.com'  
This is the email adress of the contact person on the front page and used in footer.
- date: 2021-07-01  
The date of the document. Use `\today` to use current date.
- institution: Lillebaelt Academy (default: "UCL university college")  
For the front page. Don't change this, since it matches the logo.
- left-header: 2021-07-01  
Header text to the left.
- right-header: Template test  
Header text to the right. Use document title if in doubt.
- skip-toc: false (Default: false)  
Skip table of content. Usable for short documents.
- skip-lof: false (Default: false)  
Skip list of figures. Usable for documents with few figures.
- status: draft (Default: empty)  
Show a watermark across all pages with the word written as status. Default is no watermark.
